

Sustainable Style, Threads of the Future

Project's Name: From Clothes To Rugs

The road to the rug

The rope we
made ourselves

Weaving stage

Objective:

Our aim is to offer a recycling alternative for textile waste, which has reached a level that cannot be ignored today.

How We Realised:

First of all, we bought materials with suitable fabrics that were separated to go to waste in textile workshops. We separated the materials we bought one by one and turned them into yarn. We created a rug by combining the materials we made into yarn.

What It Adds to Us;

As we worked as a team, we learnt how to work as a team. We got to know our own culture better by visiting various museums. As a result of our researches, we became more aware of how our world is facing a great ecological danger. We learnt about how to weave a rug.
